- REMAIN SOFT, SUPPLE AND FLEXIBLE
- WILL NOT SHRINK OR BECOME BRITTLE

THE ULTIMATE IN BREAK-OPEN, THERMAL AND FLAME PROTECTION, COMFORT AND DURABILITY.

PROTECTION. COMFORT. DURABILITY.

PBI-blended fabrics have been the preferred choice of active fire brigades around the world for over 30 years.

Our innovative products give firefighters the utmost protection in the harshest of conditions.

THE PBI ADVANTAGE

Exceptional heat and flame protection, comfort and durability.

Outer shell fabrics blended with PBI fibers and para-aramid or flame resistant viscose fibers continue to redefine the standard for personal protection.

Our commitment to firefighters' safety is our mission. That's why fire brigades requiring high-performance, flame-resistant protection, comfort and durability choose PBI fabrics.

DID YOU KNOW?

- PBI is the trade name for polybenzimidazole.
- PBI Performance Products, Inc. is the world’s sole producer of PBI fiber.
- From the time PBI was introduced to NASA for the Apollo missions in the late 1960s, it has been regarded as the best protection available for high-heat and flame applications.
