X55 is a further addition to the range of PBI fabrics that combines high mechanical strength with all of the proven benefits of PBI fiber to deliver excellent tensile strength and tear resistance. The fabric is long lasting and maintains its good looks after repeated washing.

TITAN 1260 outer shell has been developed to minimize the risk of heat stress. The smooth fabric surface offers effective air circulation, which delivers enhanced breathability and comfort. The specially selected yarns in TITAN 1260 ensure durability and strength, maintaining breathability and comfort even after repeated washing.
